

TAKE CONTROL OF *YOUR* HEALTH

MAKING SENSE OF YOUR PRESCRIPTION MEDICATION LABELS

Have you ever looked closely at your prescription label?

Your label contains important information about your medication and how to take it.

It also has important information you need in order to refill your medication.

- Always check that you have YOUR prescription. Your name should be on the bottle.
- Always check that it is the medication your doctor said you should be taking.
- Always check to see how many refills you have left. If it says 0, be sure to call your doctor's office to request more before you need them!
- Take medication as directed on the label. If you have questions, ask your doctor.
