

KING COVID and the Kids Who Cared

By Nicole Rim

KING COVID and the Kids Who Cared

Written and Illustrated by
Nicole Rim

Edited by Michael E. Lee
and Esther L. Moy

This book is dedicated
to the children of Living Fields.

NO SCHOOL!

Who knows why we need
to stay at home?

**IT'S BECAUSE OF
COROLLA VIRUS!**

**NO! IT'S CALLED
COBID 9 + 10!**

**...COWONA
BYE-WIS?**

Coronavirus is a new germ
that scientists are studying.

Up close, coronavirus looks like a tiny king!
See all those little crowns?
Let's pretend his name is King Covid.

King Covid is a bad king
who tries to make our bodies sick!

There are three places
where King Covid can
get inside and make us
sick: your eyes, your
nose, and your mouth.

But we can fight back!
Did you know that soap is a super weapon?
King Covid and his army are afraid of soap!

Soap has the ability to destroy
the virus when it's on our skin.

If we wash our hands with soap
for 20 seconds, we can protect ourselves
and others from the virus.

Also, try not to touch your face.
This will make it much harder for King Covid
to get to your eyes, nose, and mouth.

**I'M HANDS FREE.
YOU CANT HURT ME!**

If we get sick by King Covid, we might feel tired
with a cough, a sore throat, or a fever.

But don't worry! Most of us will feel better soon.

Some people have a hard time getting better
when King Covid makes them sick,
like our grandparents.

We can help them with our
secret superpower:
(King Covid doesn't know what this is)

caring!

What does caring look like?

Superpower Step #1: Wash our hands!

As we've learned, washing our hands is one of the most important things we can do to care for others because it washes away King Covid and his army!

Superpower Step #2: Cough or sneeze the right way!

Covering our coughs and sneezing into a tissue or our elbow is another way to care for people by protecting them from germs.

You see, King Covid
and his army like to
travel by air.

**ABORT! ABORT!!
IT'S THE ELBOW PIT
OF DOOM!**

But they can't land on other people
and make them sick if we cough
or sneeze the right way.

Superpower Step #3: Reach out to others!

Think about the people that you miss.

Mail them a picture, write a letter, say a prayer for them,
or talk to them over the phone.

Now that you know all these things,
can you think of other ways to practice
your superpower?

Let's practice our superpower every day.
We can make a difference in this world
when we choose to care.

**Please make a donation to help protect
our brave healthcare workers!**
