

# FAMILY VOICES

Informing & improving services and supports for New Hampshire families

## Why Family Voices Matter

Key decision-makers and providers want to hear from families so that they don't have to make assumptions about what families want and need.

When families share what they know, it ensures that family services and supports work for the the people who use them.

## What is Family Voice?

An opportunity for families to share their needs, wants, and experiences to build relationships and inspire positive change within the systems that serve them.

## How Can Family Voices be Heard ?

At appointments with providers, and by following up when you have questions

Joining an advisory council or workgroup

Sharing your experiences and ideas

Speaking up when something doesn't feel like a good fit for your family

Participating in focus groups or surveys

## Family Voices Impact the Systems that Serve Us at All Levels
